
Sprott Funds Trust

**Sprott Gold Miners ETF (SGDM)
Sprott Junior Gold Miners ETF (SGDJ)**

**Supplement dated December 13, 2022
to the Prospectus dated April 29, 2022**

At a meeting of the Board of Trustees of Sprott Funds Trust (the "Trust") on December 5, 2022, the Trustees of the Trust were informed about the reduction of the number of shares constituting a Creation Unit of each of Sprott Gold Miners ETF and Sprott Junior Gold Miners ETF (each, a "Fund" and together the "Funds") from 50,000 shares to 10,000 shares and corresponding reduction in creation and redemption transaction fees for each of the Funds from \$500 to \$300, in each case effective as of the close of business on December 30, 2022.

Accordingly, the following sections of the Funds' Prospectus have been supplemented or restated, as shown below, with effect as of the close of business on December 30, 2022.

The reference to Creation Units of "50,000 shares" is replaced with "10,000 shares" in the first paragraph of the subsection entitled "Purchase and Sale of Fund Shares" under "Summary Information – Sprott Gold Miners ETF" on page 7 of the Prospectus.

The reference to Creation Units of "50,000 shares" is replaced with "10,000 shares" in the first paragraph of the subsection entitled "Purchase and Sale of Fund Shares" under "Summary Information – Sprott Junior Gold Miners ETF" on page 14 of the Prospectus.

The last sentence in the "General" subsection of the section entitled "Shareholder Information" on page 25 of the Prospectus is replaced with the following:

Investors may acquire shares directly from the Fund, and shareholders may tender their shares for redemption directly to the Fund, only in Creation Units of 10,000 shares, as discussed in the "How to Buy and Sell Shares" section below.

The reference to Creation Units of "50,000 shares" is replaced with "10,000 shares" in the "Creation Units" subsection of the section entitled "How to Buy and Sell Shares" on page 27 of the Prospectus.

The reference to a "fixed creation transaction fee of \$500" is replaced with "fixed creation transaction fee of \$300" in the fourth paragraph of the subsection "How to Buy Shares" in the section entitled "How to Buy and Sell Shares" on page 27 of the Prospectus.

The reference to a "fixed redemption transaction fee of \$500" is replaced with "fixed redemption transaction fee of \$300" in the third paragraph in the subsection "Redemption of Shares" in the section entitled "How to Buy and Sell Shares" on page 28 of the Prospectus.

You should read this Supplement in conjunction with the Fund's Prospectus and Statement of Additional Information, dated April 29, 2022, which provide information that you should know about the Fund before investing. These documents are available upon request and without charge by calling the Fund toll-free at 1-888-622-1813.

Please retain this Supplement for future reference.

Summary Prospectus

April 29, 2022

Sprott Funds Trust

Sprott Gold Miners ETF (NYSE Arca: SGDM)

The Securities and Exchange Commission has not approved or disapproved these securities or passed upon the adequacy of this Prospectus. Any representation to the contrary is a criminal offense.

SUMMARY PROSPECTUS
April 29, 2022
Sprott Funds Trust

Sprott Gold Miners ETF

Before you invest, you may want to review Sprott Gold Miners ETF’s (“Fund”) statutory prospectus (“Prospectus”), which contains more information about the Fund and its risks. The Fund’s Prospectus and Statement of Additional Information, both dated April 29, 2022, are incorporated by reference into this Summary Prospectus. For free paper or electronic copies of the Fund’s Prospectus and other information about the Fund, go to www.sprottets.com. You can also obtain this information at no cost by calling 1-888-622-1813 or sending an email request to invest@sprott.com, or by contacting your financial intermediary.

Investment Objective

The Sprott Gold Miners ETF (the “Fund”) seeks investment results that correspond (before fees and expenses) to the performance of its underlying index, the Solactive Gold Miners Custom Factors Total Return Index (ticker symbol SOLGMCFT) (the “Underlying Gold Miners Index”).

Fund Fees and Expenses

The table below describes the fees and expenses that you pay if you buy, hold and sell shares of the Fund (“Shares”). **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.**

<u>Shareholder Fees</u> (fees paid directly from your investment)	<u>None</u>
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fee	0.35%
Other Expenses	0.14%
Total Annual Fund Operating Expenses	0.49%
Fee Waiver/Expense Reimbursement ¹	0.01%
Total Annual Fund Operating Expenses After Fee Waiver/ Expense Reimbursements	0.50%

Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. This example does not take into account brokerage commissions that you pay when purchasing or selling shares.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your shares at the end of those periods. The example also assumes that your investment has a 5% annual return and that the Fund’s operating expenses remain the same. The expense example assumes that the Expense Limit will be terminated after one year.

	<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
Although your actual costs may be higher or lower, based on these assumptions your costs would be:	\$51	\$158	\$275	\$617

¹ Sprott Asset Management LP (the “Adviser”), the investment adviser to the Fund, has contractually agreed to waive the management fee, and/or reimburse expenses so that Total Annual Fund Operating Expenses After Fee Waiver/Expense Reimbursements (not including distribution (12b-1) fees, shareholder service fees, acquired fund fees and expenses, taxes,

brokerage commissions and extraordinary expenses) do not exceed a maximum of 0.50% of the share's average daily net assets through April 30, 2023. The Adviser will be permitted to recover expenses it has borne through the agreement described above to the extent that the Fund's expenses in later periods fall below the annual rates set forth in the expense agreement. The Fund's fee waiver/expense reimbursement arrangements with the Adviser permit the Adviser to recapture only if any such recapture payments do not cause the Fund's expense ratio (after recapture) to exceed the lesser of (i) the expense cap in effect at the time of the waiver and (ii) the expense cap in effect at the time of the recapture. The Fund will not be obligated to pay any such deferred fees and expenses more than three years after the particular date in which the fees and expenses was deferred. This expense agreement may only be terminated during the period by the Board of Trustees of Sprott Funds Trust (the "Trust").

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it purchases and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may result in higher transaction costs and higher taxes when shares are held in a taxable account. These costs may affect the Fund's performance. These costs, which are not reflected in annual fund operating expenses or in the Example, may affect the Fund's performance. For the fiscal year ended December 31, 2021, the Fund's portfolio turnover rate was 66% of the average value of its portfolio.

Principal Investment Strategies of the Fund

The Fund employs a "passive management" — or indexing — investment approach designed to track the performance of the Underlying Gold Miners Index. The Underlying Gold Miners Index aims to track the performance of gold companies located in the U.S. and Canada whose common stocks or American Depositary Receipts ("ADRs") are traded on the Toronto Stock Exchange, the New York Stock Exchange and NASDAQ. The Underlying Gold Miners Index is compiled by Solactive AG (the "Index Provider"). In order to be included in the Underlying Gold Miners Index, companies must be an index component of the Solactive Equal Weights Global Gold Index. The Solactive Equal Weight Global Gold Index includes all companies classified under any of the following FactSet Revere Business Industry Classification System ("RBICS") industries: Americas Gold Mining, Asia/Pacific Gold Mining and Other Gold Mining that are listed on the Toronto Stock Exchange, the New York Stock Exchange and NASDAQ in the form on common stocks or American Depositary Receipts ("ADRs"). On selection days, existing index members of the Solactive Equal Weight Global Gold Index must have free float market capitalization of USD \$375 million. New index members need to have a free float market capitalization of USD \$750 million. Furthermore, new index members must have a minimum Average Daily Traded Value of at least USD \$2 million, while existing index members must have a minimum Average Traded Value of at least USD \$1 million over the past 1-month and 6-month periods. The Underlying Gold Miners Index employs a modified market capitalization weighted methodology such that each constituent comprises no more than 18% of the weight of the Underlying Gold Miners Index as of each rebalance, no more than 50% of the weight of Underlying Gold Miners Index may consist of constituents comprising greater than 4.5% of the weight of the Underlying Gold Miners Index. A company in the Underlying Gold Miners Index will be classified as a gold mining company if it earns over 50% of its revenue from the mining of gold.

The Underlying Gold Miners Index is reconstituted and rebalanced quarterly five business days after the close of the third Thursday of February, May, August and November. Under normal circumstances, at least 80% of the Fund's assets (net assets plus borrowings for investment purposes) will consist of securities issued by gold mining companies, and at least 80% of the Underlying Gold Miners Index will consist of such companies.

The Fund will normally invest at least 90% of its net assets in securities that comprise the Underlying Gold Miners Index.

The Fund may engage in securities lending.

Principal Risks of Investing in the Fund

There is no assurance that the Fund will meet its investment objective. The value of your investment in the Fund, as well as the amount of return you receive on your investment in the Fund, may fluctuate significantly. You may lose part or all of your investment in the Fund or your investment may not perform

as well as other similar investments. Therefore, you should consider carefully the following risks before investing in the Fund. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the FDIC or any government agency.

Investors in the Fund should be willing to accept a high degree of volatility in the price of the Fund's shares and the possibility of significant losses. An investment in the Fund involves a substantial degree of risk. Therefore, you should consider carefully the following risks before investing in the Fund.

Gold and Silver Mining Industry Risk. The Fund is sensitive to changes in, and its performance will depend to a greater extent on, the overall condition of the gold and silver mining industry. In times of stable economic growth, traditional equity and debt investments could offer greater appreciation potential and the value of gold, silver and other precious metals may be adversely affected, which could in turn affect the Fund's returns. The gold and precious metals industry can be significantly affected by competitive pressures, central bank operations, events relating to international political developments, the success of exploration projects, commodity prices, adverse environmental developments and tax and government regulations.

Relationship to Gold and Silver Risk. The Underlying Gold Miners Index measures the performance of equity securities of companies engaged in gold and silver mining and related services in the precious metals sector. The Underlying Gold Miners Index does not measure the performance of direct investment in gold and silver and, therefore, may not move in the same direction and to the same extent as the spot prices of gold and silver.

Market Risk and Selection Risk. Market risk is the risk that one or more markets in which the Fund invests will go down in value, including the possibility that the markets will go down sharply and unpredictably. The value of a security or other asset may decline due to changes in general market conditions, economic trends or events that are not specifically related to the issuer of the security or other asset, or factors that affect a particular issuer or issuers, exchange, country, group of countries, region, market, industry, group of industries, sector or asset class. Local, regional or global events such as war, acts of terrorism, the spread of infectious illness or other public health issue, e.g., COVID-19, recessions, or other events could have a significant impact on the Fund and its investments. Selection risk is the risk that the securities selected by Fund management will underperform the markets, the relevant indices or the securities selected by other funds with similar investment objectives and investment strategies. This means you may lose money.

Authorized Participant Concentration Risk. Only an Authorized Participant (as defined in the Creations and Redemptions section of the Fund's prospectus) may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that act as Authorized Participants. To the extent that these institutions exit the business or are unable to proceed with creation and/or redemption orders with respect to the Fund and no other Authorized Participant is able to step forward to create or redeem Creation Units, Fund shares may trade at a discount to net asset value per share ("NAV") and possibly face trading halts and/or delisting.

Concentration Risk. The Fund seeks to track the Underlying Gold Miners Index, which itself is currently concentrated in the gold and silver mining industry. Underperformance or increased risk in such concentrated areas may result in underperformance or increased risk in the Fund.

Currency Risk. The Funds may invest its assets in securities denominated in non-U.S. currencies. Changes in currency exchange rates and the relative value of non-U.S. currencies will affect the value of a Fund's investment and the value of the Shares. Because a Fund's NAV is determined in U.S. dollars, a Fund's NAV could decline if the currency of the non-U.S. market in which a Fund invests depreciates against the U.S. dollar, even if the value of a Fund's holdings, measured in the foreign currency, increases. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the value of an investment in a Fund may change quickly and without warning and you may lose money.

Cybersecurity and Disaster Recovery Risks. Information and technology systems relied upon by the Fund, the Adviser, the Fund's other service providers (including, but not limited to, the Fund Accountant, Custodian, Transfer Agent, Administrator, Distributor and index providers), market makers, Authorized Participants, financial intermediaries and/or the issuers of securities in which the Fund invests may be vulnerable to damage or interruption from computer viruses, network failures,

computer and telecommunication failures, infiltration by unauthorized persons, security breaches, usage errors, power outages and catastrophic events such as fires, tornadoes, floods, hurricanes and earthquakes. Although the Adviser and the Fund's other service providers have implemented measures to manage risks relating to these types of events, if these systems are compromised, become inoperable for extended periods of time or cease to function properly, significant investment may be required to fix or replace them. The failure of these systems and/or of disaster recovery plans could cause significant interruptions in the operations of the Fund, the Adviser, ALPS Advisors, Inc., the Fund's sub-adviser (the "Sub-Adviser"), the Fund's other service providers, market makers, Authorized Participants, financial intermediaries and/or issuers of securities in which the Fund invests and may result in a failure to maintain the security, confidentiality or privacy of sensitive data, impact the Fund's ability to calculate its net asset value or impede trading.

Depository Receipt Risk. The Fund may invest in depository receipts which involve similar risks to those associated with investments in foreign securities. Investments in depository receipts may be less liquid than the underlying shares in their primary trading market and, if not included in the Underlying Gold Miners Index, may negatively affect the Fund's ability to replicate the performance of the Underlying Gold Miners Index.

Fluctuation of Net Asset Value Risk. The NAV of the Fund's shares will generally fluctuate with changes in the market value of the Fund's holdings. The market prices of the shares will generally fluctuate in accordance with changes in NAV as well as the relative supply of and demand for shares on NYSE Arca, Inc. (the "NYSE Arca"). The Adviser cannot predict whether the shares will trade below, at or above their NAV. The Fund's market price may deviate from the value of its underlying portfolio holdings, particularly in times of market stress, with the result that investors may pay significantly more or receive significantly less than the underlying value of the Fund shares bought or sold. This can be reflected as a spread between the bid and ask prices for the Fund quoted during the day or a premium or discount in the closing price from the Fund's NAV. In addition, transactions by large shareholders may account for a large percentage of the trading volume on the NYSE Arca and may, therefore, have a material effect on the market price of the Fund's shares.

Foreign Investment Risk. The Fund's investments in non-U.S. issuers, although limited to ADRs, may involve unique risks compared to investing in securities of U.S. issuers. Adverse political, economic or social developments could undermine the value of the Fund's investments or prevent the Fund from realizing the full value of its investments. Countries with emerging markets may present heightened risks of nationalization of businesses, restrictions on foreign ownership and prohibitions on the repatriation of assets. The economies of emerging markets countries also may be based on only a few industries, making them more vulnerable to changes in local or global trade conditions and more sensitive to debt burdens, inflation rates or adverse news and events. Where all or a portion of the Fund's underlying securities trade in a market that is closed when the market in which the Fund's shares are listed and trading in that market is open, there may be changes between the last quote from its closed foreign market and the value of such security during the Fund's domestic trading day. In addition, please note that this in turn could lead to differences between the market price of the Funds' shares and the underlying value of those shares.

Investments in Canadian issuers may subject the Fund to economic risk specific to Canada. Among other things, the Canadian economy is heavily dependent on relationships with certain key trading partners, including the United States and China. The Canadian economy is sensitive to fluctuations in certain commodity markets.

Geographic Concentration Risk. To the extent the Underlying Gold Miners Index and the Fund are significantly comprised of securities of issuers from a single country, the Fund would be more likely to be impacted by events or conditions affecting that country.

Index Management Risk. The Fund is not "actively" managed. Therefore, it would not necessarily sell a security because the security's issuer was in financial trouble unless that security is removed from the Underlying Gold Miners Index. Additionally, the Fund rebalances its portfolio in accordance with its Underlying Gold Miners Index, and, therefore, any changes to the Underlying Index's rebalance schedule will result in corresponding changes to the Fund's rebalance schedule.

Investment Risk. An investment in the Fund is subject to investment risk including the possible loss of the entire principal amount that you invest.

Issuer-Specific Risk. The value of an individual security or particular type of security can be more volatile than the market as a whole and can perform differently from the value of the market as a whole.

Liquidity Risk. It may be more difficult for the Fund to buy and sell significant amounts of some securities without an unfavorable impact on prevailing market prices. As a result, these securities may be difficult to dispose of at a fair price at the times when the Sub-Adviser believes it is desirable to do so.

Non-Correlation Risk. The Fund's return may not match the return of Underlying Gold Miners Index for a number of reasons, including operating expenses incurred by the Fund not applicable to the Underlying Gold Miners Index, costs in buying and selling securities, asset valuation differences and differences between the Fund's portfolio and the Underlying Gold Miners Index resulting from legal restrictions, cash flows or operational inefficiencies. An active trading market for shares of the Fund may not develop or be maintained. Please also note that in times of market stress, market makers or authorized participants may step away from their respective roles in making a market in shares of the Fund and in executing purchase or redemption orders, and that this could in turn lead to variances between the market price of the Fund's shares and the underlying value of those shares.

Non-Diversified Fund Risk. The Fund is considered non-diversified and can invest a greater portion of assets in securities of individual issuers than a diversified fund. As a result, changes in the market value of a single investment could cause greater fluctuations in share price than would occur in a diversified fund.

Portfolio Turnover Risk. The strategy used by the Fund may result in high portfolio turnover. A higher portfolio turnover will result in higher transactional costs and may result in higher taxes when Fund shares are held in a taxable account.

Securities Lending. Although the Fund will receive collateral in connection with all loans of its securities holdings, the Fund would be exposed to a risk of loss should a borrower default on its obligation to return the borrowed securities (e.g., the loaned securities may have appreciated beyond the value of the collateral held by the Fund). In addition, the Fund will bear the risk of loss of any cash collateral that it invests.

Small- and Mid-Capitalization Company Risk. Smaller and mid-size companies often have a more limited track record, narrower markets, less liquidity, more limited managerial and financial resources and a less diversified product offering than larger, more established companies. As a result, their performance can be more volatile, which may increase the volatility of the Fund's portfolio.

Performance

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time.

On July 19, 2019, the Sprott Gold Miners ETF (the "Gold Predecessor Fund"), a series of ALPS ETF Trust, was reorganized into the Fund, a series of Sprott Funds Trust. The Fund is a continuation of the Gold Predecessor Fund and, therefore, the performance information shown prior to July 22, 2019 presents the performance of the Gold Predecessor Fund. The following bar chart and table provide an indication of the risks of investing in the Fund by showing changes in the Fund's performance from year to year and by showing how the Fund's average annual returns for certain time periods compare with the average annual returns of the target index and of other benchmarks of market performance. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Total return figures assume reinvestment of dividends and include the effect of the Fund's recurring expenses. Shareholder reports containing financial and performance information will be distributed to shareholders semi-annually. Updated performance information will be available at no cost by visiting www.sprottets.com or by calling (888) 622-1813.

Annual Total Returns (calendar year ended 12/31)

Highest Quarterly Return	57.93%	(June 30, 2020)
Lowest Quarterly Return	-22.03%	(December 31, 2016)

The after-tax returns presented in the table below are calculated using highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Your actual after-tax returns will depend on your specific tax situation and may differ from those shown below. After-tax returns are not relevant to investors who hold shares of the Fund through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

Average Annual Total Returns

For periods ended December 31, 2021

	1 Year	5 Year	Since Inception (July 14, 2014)
Return Before Taxes	-9.33%	8.40%	1.82%
Return After Taxes on Distributions	-9.63	8.28	1.69
Return After Taxes on Distributions and Sale of Fund Shares	-5.33	6.65	1.40
Solactive Gold Miners Custom Factors Total Return Index* (reflects no deduction for fees, expenses or taxes)	-9.19%	9.26%^	2.61%^
S&P 500 Index* (reflects no deduction for fees, expenses or taxes)	28.71	18.47	14.71

* Index performance shown in the table is the total return, which assumes reinvestment of any dividends and distributions during the time periods shown.

^ From the Gold Fund's inception to July 19, 2019, the Gold Fund's objective was to track the Spratt Zacks Gold Miners Total Return Index ("predecessor index") and since that date the Gold Fund has been seeking to track the Solactive Gold Miners Custom Factors Total Return Index. The index performance presented reflects the performance of the predecessor index through July 19, 2019 and thereafter reflects the performance of the Solactive Gold Miners Custom Factors Total Return Index.

Management

Adviser

Sprott Asset Management LP is the investment adviser to the Fund.

Sub-Adviser

ALPS Advisors, Inc. is the sub-adviser to the Fund.

Portfolio Managers

Ryan Mischker, Vice President, Portfolio Management & Research, and Andrew Hicks, Vice President of Index Management of ALPS Advisors, Inc., are responsible for the day to day management of the Fund. Mr. Mischker and Mr. Hicks have each served in such capacity since the Fund's inception in July 2019 and previously with the Gold Predecessor Fund since March 2015 and March 2016, respectively.

Purchase and Sale of Fund Shares

The Fund issues and redeems shares at NAV only in a large specified number of shares each called a "Creation Unit," or multiples thereof, and only with "authorized participants" that have entered into contractual arrangements with ALPS Distributors, Inc., the Fund's distributor ("Distributor"). A Creation Unit consists of 50,000 shares. Creation Unit transactions are typically conducted in exchange for the deposit or delivery of in-kind securities in the Fund's portfolio and/or cash.

Individual shares of the Fund may only be purchased and sold on NYSE Arca through brokers. Shares of the Fund are listed on NYSE Arca and because shares will trade at market prices rather than NAV, shares of the Fund may trade at a price greater than or less than NAV. An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares of the Fund (bid) and the lowest price a seller is willing to accept for shares of the Fund (ask) when buying or selling shares in the secondary market (the "bid-ask spread").

Information regarding the Fund's NAV, market price, premiums and discounts, and bid-ask spreads can be viewed on the Fund's website at www.sprottets.com.

Tax Information

Fund distributions are generally taxable as ordinary income, qualified dividend income, or capital gains (or a combination), unless your investment is in an individual retirement account ("IRA") or other tax-advantaged account. Distributions on investments made through tax-deferred arrangements may be taxed later upon withdrawal of assets from those accounts.

Payments to Broker-Dealer and Other Financial Intermediaries

If you purchase shares through a broker-dealer or other financial intermediary, the Adviser or other related companies may pay the intermediary for the sale of shares or related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
