IMPORTANT DISCLOSURES & DEFINITIONS

Read the Prospectuses carefully before investing.

The Funds are not suitable for all investors. There are risks involved with investing in ETFs including the loss of money. The Funds are considered non-diversified and can invest a greater portion of assets in securities of individual issuers than a diversified fund. As a result, changes in the market value of a single investment could cause greater fluctuations in share price than would occur in a diversified fund.

Shares are not individually redeemable. Investors buy and sell shares of the Sprott Gold Miners ETF and Sprott Junior Gold Miners ETF on a secondary market. Only market makers or “authorized participants” may trade directly with the Fund, typically in blocks of 50,000 shares.

Funds that emphasize investments in small/mid cap companies will generally experience greater price volatility. Diversification does not eliminate the risk of experiencing investment losses. ETFs are considered to have continuous liquidity because they allow for an individual to trade throughout the day. A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses, affect the Fund’s performance.

ALPS Distributors, Inc. is the Distributor for the Sprott Junior Gold Miners ETF and is a registered broker-dealer and FINRA Member.
