How Did the Fund Perform Last Year?

The Sprott Junior Gold Miners ETF returned 174.57% for the 12 months ended December 31, 2025. For this period, the three largest contributors to performance were Aris Mining Corp., Resolute Mining Ltd. and K92 Mining Inc. The three largest performance detractors were Catalyst Metals Ltd., Bumi Resources Minerals Tbk PT and Integra Resources Corp.

Junior gold miners benefited from a strong 2025 backdrop as investor demand for gold accelerated and the metal's role as a strategic reserve asset strengthened. Central bank buying remained a key driver as deglobalization and de-dollarization increased the appeal of gold as a neutral, non-liability store of value. The debasement trade gained momentum as fiscal dominance and renewed liquidity support weighed on confidence in fiat currencies and traditional hedges, while tariff and trade uncertainty reinforced safe-haven demand. Easier monetary policy, alongside expectations for additional rate cuts, supported gold's standing. Rising geopolitical tensions added to risk premia, reinforcing the bid for gold. Junior gold miners benefited from this environment, due to their operating leverage to the increase in the gold spot price.
