Sprott Active Metals & Miners ETF (Nasdaq: METL) is an actively managed ETF that aims to provide long-term capital appreciation by investing in companies across the metals and mining industry lifecycle, including miners, recyclers, and royalty and streaming companies associated with commodities that are in high global demand. The Fund's investment strategy is value-oriented and contrarian.

Key Points

- 1. Actively Managed by a Global Leader** – Sprott Asset Management has over four decades of specialized leadership in metals and mining investments.
- 2. Value of Active Management in Miners** – Given the operational complexities of mining and the cyclical nature of individual commodities, investors may benefit from a specialized, value-oriented perspective focused on business fundamentals and macroeconomic outlook. Active management seeks to mitigate risk, provide strategic flexibility and capitalize on informed engagement in niche markets.
- 3. A Dynamic Portfolio of Metals** – METL portfolio managers have the flexibility to invest in equities associated with a wide range of metals that they believe may generate attractive returns from operations and provide exposure to specific metals potentially positioned for outperformance based on market and global supply-demand conditions.
- 4. The Flexibility of an Active ETF** – METL combines the daily transparency, liquidity and potential tax efficiency of an ETF with the expertise of active management.

Sprott has offices in Toronto, New York, Connecticut and California and the company's common shares are listed on the New York Stock Exchange and the Toronto Stock Exchange under the symbol (SII). For more information, please visit www.sprott.com.

IMPORTANT DISCLOSURES & DEFINITIONS

An investor should consider the investment objectives, risks, charges and expenses carefully before investing. To obtain a Sprott Active Metals & Miners ETF Statutory Prospectus, which contains this and other information, visit <https://sprottets.com/metl/prospectus>, contact your financial professional or call 1.888.622.1813. Read the Prospectus carefully before investing.

The Sprott Active Metals & Miners ETF is new and has limited operating history. Investors in the Fund should be willing to accept a high degree of volatility in the price of the Fund's shares and the possibility of significant losses. The Fund will be concentrated in metals, mining and related industries. Companies in the metals and mining industry are susceptible to fluctuations in worldwide metal prices and extraction and production costs. In addition, metals and mining companies may have significant operations in areas at risk for social and political unrest, security concerns and environmental damage. These companies may also be at risk for increased government regulation and intervention. Such risks may adversely affect the Fund. The Fund is not suitable for all investors. The Fund is considered non-diversified and can invest a greater portion of assets in securities of individual issuers than a diversified fund. As a result, changes in the market value of a single investment could cause greater fluctuations in share price than would occur in a diversified fund.

The Fund adviser's judgments about the growth, value, or potential appreciation of an investment may prove to be incorrect or fail to have the intended results, which could adversely impact the Fund's performance relative to its benchmark.

Shares are not individually redeemable. Investors buy and sell shares of the Sprott Active Metals & Miners ETF on a secondary market. Only "authorized participants" may trade directly with the Fund, typically in blocks of 10,000 shares.

Funds that emphasize investments in small/mid-cap companies will generally experience greater price volatility. Diversification does not eliminate the risk of investment losses. ETFs are considered to have continuous liquidity because they allow an individual to trade throughout the day. A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual Fund operating expenses, affect the Fund's performance.
